

# Class 4

## Autumn Term

Using oil pastels to create a landscape image.

The mummification process

DT day embroidering our stockings

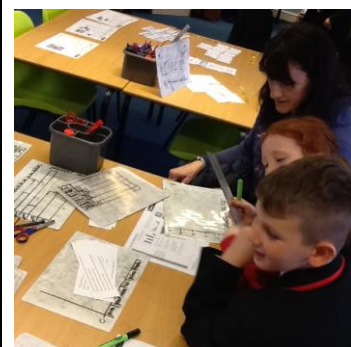

We have had a fantastic term in Class 4! We have been really busy in our lessons and have learnt about different countries in geography, Ancient Egypt in history, light and states of matter in science and People of God in RE.

In our maths lessons, we have covered lots including: place value, addition, subtraction, multiplication, division, fractions, money and angles.

In English, we have written persuasive leaflets, stories set in another culture and instructions. We have produced some amazing pieces of writing in Class 4!

Within all our hard work, we got lots of opportunities to have fun in our class! We took a trip to the local stream to create some landscape images using oil pastels. While we were learning about Ancient Egypt, we rein-acted the mummification process and turned one of our class into a mummy! At the end of the term, we also had a DT day when we got to embroider our own Christmas stockings.

Next term, we will be having lots more exciting lessons with topics such as sound in science, the United Kingdom in geography and information texts and poetry in English.

Maths parent workshop

Using maps to locate countries

Writing in Egyptian hieroglyphics
